

Student Project Programme (SPP) – 33rd Series

Important Announcement

KSCST has received more than 1000 project proposals from various engineering colleges for sponsorship under 33rd Series of SPP.

The Council had intimated all engineering colleges to send only good / quality project proposals after due in-house evaluation of projects in each of the disciplines. Even with this advance instruction, we have received over 1075 project proposals from 88 engineering colleges all over the state. We thank all the engineering colleges for their good response.

These project proposals are in the process of evaluation by experts from Indian Institute of Science and other R&D Institutions.

Due to the receipt of large number of project proposals, it is taking considerable time for evaluation of proposals for sponsorship. Because of this delay, KSCST will be announcing the selection list of sponsored proposals by 20th March 2010.

The students who have submitted their proposals may start their project work, not waiting for our sponsorship.

The best / quality projects will be selected for sponsorship and will be intimated to project guide and head of the department.
