A Project Report on

**“A STUDY ON EFFECT OF DOUBLE CONVEX LENS
PARAMETERS ON SOLAR ENERGY HEATING”**

A dissertation submitted to the Basaveshwar Engineering College, Bagalkot in partial fulfillment of the requirements for the award of the degree of

**Bachelor of Engineering
In
Mechanical Engineering**

Submitted By

**Mr. Naveen. R. Shirur
(USN: 2BA07ME047)**

**Mr. Jamal. M. Pathan
(USN: 2BA07ME024)**

**Mr. Abhishek. V. Chintamani
(USN: 2BA07ME001)**

Under the guidance of

Prof. V. V. Kuppast

**Department of Mechanical Engineering
2010-2011**

1. INTRODUCTION

Fig1

It is very well known concept that when sun rays are converged through a convex lens, enormous heat is generated at focal point which can be trapped for useful applications. The present work is based on this concept.
