ABSTRACT

Saving time is become an important factor and wasting it for the purpose of shopping is not affordable. At present, standing in a long queue for Billing, Consumption of large square feet of area, Mishandling of items, Workload on employees which remain as a major problem that need to be fixed.

In order to solve this, we make use of Barcode Reader concept. (Definition)

Virtual Basket –Meant for smart shoppers contributes on reducing current day shopping problems. Barcode is attached in each item and Customer card. Billing in done faster, large area of space is preserved and Single display of item is kept, Workload on employees is highly reduced.

The proposed project on Virtual Basket serves to provide a way to efficient management of time and have an easier, happier way of shopping.
