Project report

on

"REMOTE VOTING SYSTEM USING VISUAL CRYPTOGRAPHY"

(Sponsored by **KSCST 36th series**)

Submitted in partial fulfillment for the award of degree of

BACHELOR OF ENGINEERING

in

INFORMATION SCIENCE & ENGINEERING

Project Associates:

ADHYA S (4VV08IS002) **AISHWARYA V (4VV08IS004)**

JAYATHI B R (4VV08IS021) **NAMRATHA ALVA (4VV08IS031)**

Under the guidance

of

Mr. RAJENDRA A B

Associate Professor, Department of Information Science & Engineering

&

Mr. SHASHANK D

Assistant Professor, Department of Information Science & Engineering

VIDYAVARDHAKA COLLEGE OF ENGINEERING

GOKULAM III STAGE, MYSORE-570002

2013

ABSTRACT

Remote Voting System for Corporate Companies Using Visual Cryptography aims at providing the voters a facility to cast their vote for the elections that are conducted. They can vote from any place without them coming to the place where the elections are conducted by using the features that are provided by visual cryptography that are implemented in Remote Voting System. The election will go on with good security measures because the voter can only vote for the candidate only if he logs into his login by entering the correct password that is got by merging the two shares.
