ABSTRACT

Now a days technology is running with time, it completely occupied the life style of human beings. Even though there is such an importance for technology in our routine life there are even people whose life styles are very far to this well-known term technology. So it is our responsibility to design few reliable systems which can be even efficiently used by them. This basic idea gave birth to the project GSM based irrigation water pump controller for Illiterates and this project aims in introducing the automation technology into the lives of the illiterates.

This project aims in providing a user friendly, reliable and automated water pumping system for illiterates.
