

Table of Contents

INTRODUCTION	5
1.1 General	5
1.2 Salinity Intrusion in coastal Aquifer.....	6
1.3 Location and accessibility of the study area.....	7
1.4 Climatic condition	7
1.5 Geology	10
1.6 Demography.....	11
1.7 Previous work	12
1.8 Scope of the present study	12
METHODOLOGY	14
2.1 Preliminary survey	14
2.2 Water levels.....	15
2.3 Water quality	16
2.4 Data processing and interpretation	16
Parameters for GALDIT	17
Results and Discussion.....	17
3.1 Water levels change study.....	17
3.2 water quality	21
3.2.1 Sample collection	21
3.2.2 Chemical analyses.....	21
3.2.2.1 Hydrogen ion concentration (pH)	25
3.2.2.2 Electrical conductivity (EC)	27
3.2.2.3 Total dissolve solids (TDS).....	29
3.2.2.4 Total alkalinity (TA).....	32
3.2.2.5 Chloride (cl)	32
3.2.2.6 Calcium (ca)	32
3.2.2.7 Magnesium (Mg).....	35
3.2.2.8 Total hardness.....	37
3.2.2.9 Sodium (Na)	39
3.2.2.10 Potassium (K).....	41
3.3 Hourly Distribution of Depth and Salinity.....	43

3.3.1	Variation in the water depths in three observation well.	44
3.3.2	Variation in the water depths in three observation wells	46
3.4	GALDIT METHOD	47
Conclusion.....		58
Future Scope		58

List of Table

<i>Table 1: schedule of sampling</i>	<i>14</i>
<i>Table 2 : table showing the sampling locations with GPS Coordinates.....</i>	<i>14</i>
<i>Table 3 : Water Quality analysis results for sampling 1 (January 2015)</i>	<i>22</i>
<i>Table 4 : Water Quality analysis results for sampling 3 (April 2015)</i>	<i>23</i>
<i>Table 5: Water quality analysis results for sampling 3 (May 2015)</i>	<i>24</i>
<i>Table 6: Table showing the change in the volume during hurly sampling.....</i>	<i>44</i>
<i>Table 7: Weightage indicators for GALDIT method.</i>	<i>47</i>
<i>Table 8: Ratings for Ground Water Occurrence in GALDIT Method.....</i>	<i>48</i>
<i>Table 9: Ratings Aquifer Hydraulic Conductivity in GALDIT METHOD</i>	<i>48</i>
<i>Table 10: Ratings for height of ground water in GALDIT Method.....</i>	<i>48</i>
<i>Table 11: Ratings adopted for distance of the point from the shore D in GALDIT Method</i>	<i>49</i>
<i>Table 12: Ratings for impact status of existing sea water intrusion in GALDIT method.....</i>	<i>49</i>
<i>Table 13: Ratings for Aquifer thickness in GALDIT Method</i>	<i>50</i>
<i>Table 14: Table showing the rating enabled GALDIT parameters for Sampling 1</i>	<i>50</i>
<i>Table 15: Table showing the rating enabled GALDIT parameters for Sampling 2</i>	<i>51</i>
<i>Table 16: Table showing the rating enabled GALDIT parameters for Sampling 3</i>	<i>52</i>

List of Figure

<i>Figure 1 : Map Showing Study Area (Image: ETM+ 2000).....</i>	<i>8</i>
<i>Figure 2: Figure showing the 3D Elevation map with 20m Interval Contour lines.....</i>	<i>9</i>
<i>Figure 3: Diagram Explaining about the various parameters collected during the sampling. ...</i>	<i>18</i>
<i>Figure 4 : Figure showing the General Trend of the Change in the depth of the water</i>	<i>19</i>
<i>Figure 5: Figure showing the General Trend of the Change in the Static depth of the water</i>	<i>19</i>
<i>Figure 6 : Figure showing the Water column various during the Postmoonsoon sampling (July to May 2015).....</i>	<i>20</i>
<i>Figure 7: Figure showing the static Water depth various during the Postmoonsoon sampling (July to May 2015).....</i>	<i>20</i>
<i>Figure 8: figure showing the Distribution of pH in the study area during January 2015</i>	<i>25</i>
<i>Figure 9: figure showing the Distribution of pH in the study area during March 2015.....</i>	<i>26</i>
<i>Figure 10: figure showing the Distribution of pH in the study area during May 2015</i>	<i>26</i>
<i>Figure 11: figure showing the Distribution of EC (salinity) in the study area during January 2015.....</i>	<i>28</i>
<i>Figure 12: figure showing the Distribution of EC (Salinity) in the study area during March 2015</i>	<i>28</i>
<i>Figure 13: figure showing the Distribution of EC (salinity) in the study area during May 2015</i>	<i>29</i>
<i>Figure 14: figure showing the Distribution of TDS in the study area during January 2015</i>	<i>30</i>
<i>Figure 15: figure showing the Distribution of TDS in the study area during March 2015.....</i>	<i>30</i>

Figure 16: figure showing the Distribution of TDS in the study area during May 2015	31
Figure 17: figure showing the Distribution of Ca in the study area during January 2015.....	33
Figure 18: figure showing the Distribution of Ca in the study area during March 2015	33
Figure 19: figure showing the Distribution of Ca in the study area during May 2015.....	34
Figure 20: figure showing the Distribution of Mg in the study area during January 2015	35
Figure 21: figure showing the Distribution of Mg in the study area during March 2015	36
Figure 22: figure showing the Distribution of Mg in the study area during May 2015	36
Figure 23: figure showing the Distribution of Total Hardness in the study area during January 2015.....	38
Figure 24: figure showing the Distribution of Total Hardness in the study area during March 2015.....	38
Figure 25: figure showing the Distribution of Total Hardness in the study area during May 2015	38
Figure 26: figure showing the Distribution of Sodium in the study area during January 2015 ..	39
Figure 27: figure showing the Distribution of Sodium in the study area during March 2015.....	40
Figure 28: figure showing the Distribution of Sodium in the study area during May 2015	40
Figure 29: figure showing the Distribution of Potassium in the study area during January 2015	41
Figure 30: figure showing the Distribution of Potassium in the study area during March 2015	42
Figure 31: figure showing the Distribution of Potassium in the study area during May 2015....	42
Figure 32: Figure showing the locations of wells for hourly variation	43
Figure 33: Figure showing the hourly variation in the water depth of at well number 1	45
Figure 34: Figure showing the hourly variation in the water depth of at well number 2	45
Figure 35: Figure showing the hourly variation in the water depth of at well number 3	45
Figure 36: Figure showing the change in the pH during hourly sampling	46
Figure 37: Figure showing the change in the Ec (Salinity) during hourly sampling.....	46
Figure 38: Figure showing the areas which are affected by the sea water intrusion during sampling 1	54
