

1.1 PROBLEM STATEMENT

In the existing system maintaining the records are difficult and also it is time consuming, the results might be time consuming process to maintain records and may be lost. To overcome this problem we are implementing student E-Counselling. The Software improves the working methods by replacing the existing manual system with the computer –based system. The E-Counselling system automates many of the activity of the manual system and increases its throughput thus the response time of the decision is lesser than the manual method.

1.2 OBJECTIVE OF PROJECT

The objective and scope of our project E-Counselling system

- Record the details of various activities of the user.
- Monitor the individual student performance.
- Enhance and upgrade the existing system by increasing its efficiency and effectiveness.
- Reduce the workload of the Faculty.

1.3 THE SOLUTION

- The solution is web based application which allows faculty to update provide IA marks and attendances of students. By doing this we can reduce paper work, no loss of records and in time decision can be taken. Faculty has to give the remarks after every internals.
- Student report can be viewed by the Head, Principal to examine the student performance. Our application is not only helpful for Students and Faculty, but also for Placement officer and Principal, information like academic performance of individual departments can also be viewed.
- Further, student may follow suggestion or guidelines to improve his/her performance.
