|------------|-----|------------------------------------------------------------------------------|---------|
|            |     | <b>ABSTRACT</b>                                                              |         |
|            |     | <b>ACKNOWLEDGEMENT</b>                                                       |         |
|            |     | <b>LIST OF FIGURES</b>                                                       |         |
|            |     | <b>LIST OF TABLES</b>                                                        |         |
|            |     | <b>NOMENCLATURES</b>                                                         |         |
|            |     | <b>MOTIVATION</b>                                                            | 6       |
| <b>1</b>   |     | <b>INTRODUCTION</b>                                                          | 7       |
|            | 1.1 | Biogas                                                                       |         |
| <b>2</b>   |     | <b>LITERATURE REVIEW</b>                                                     | 10      |
| <b>3</b>   |     | <b>BIO GAS DIGESTER</b>                                                      | 11      |
|            | 3.1 | Introduction                                                                 | 11      |
|            | 3.2 | Commonly used design of bio gas digester                                     | 11      |
|            | 3.3 | Factors to be considered while designing bio gas digester                    | 11      |
|            | 3.4 | Characteristics of input which have significant impact on bio gas production | 12      |
|            | 3.5 | Factors to considered while selecting biogas digester                        | 12      |
|            | 3.6 | Input and their characteristics                                              | 13      |
|            | 3.7 | Steps in breaking down of complex organic material                           | 14      |

|          |     |                                                   |           |
|----------|-----|---------------------------------------------------|-----------|
| <b>4</b> |     | <b>Methodology</b>                                | <b>16</b> |
|          | 4.1 | Preparation of waste                              | 16        |
|          | 4.2 | Charging of digester                              | 16        |
|          | 4.3 | Bio chemical analysis                             | 16        |
|          | 4.4 | Design criteria                                   | 17        |
|          | 4.5 | Design calculation                                | 18        |
|          | 4.6 | Procedure followed for feeding slurry to digester | 22        |
|          | 4.7 | Uses of bio gas                                   | 25        |
| <b>5</b> |     | <b>RESULTS &amp; DISCUSSION</b>                   | <b>26</b> |
| <b>6</b> |     | <b>CONCLUSION</b>                                 | <b>27</b> |
|          |     | <b>BIBLIOGRAPHY</b>                               | <b>28</b> |
|          |     | <b>Appendix</b>                                   | <b>29</b> |
|          |     |                                                   |           |
